Editor-Education World

Arjun Vajpai
Mountaineer

Vishal Vasishth
MD-Song Investment Advisors

G. Viswanathan
Chancellor-VIT

Inaugural Plenary Session I:
The Opportunities & Challenges in Educating India
The inaugural plenary session will set the theme for the day highlighting the opportunities and challenges of Educating India? Is India trending towards the Demographic Dividend or Disaster? What ails our Education System? Why do we need the Skills Mission? What can we do today to create a better future for young Indians and this \$80 billion Education/Skills industry?

Session II:
"What Employers Want?" versus "What Educators Want?"
Is Education a means to an end or an End in itself? Are Educators creating talent that Industry wants? Why are just 25% of Indian graduates employable? How can we increase employability of Indian students? What role should Vocational Education or Employers play? How can Academia-Industry collaborate? Does Education need the Employability training companies?

Session III:
Educating India: Views from Abroad
What lures 150,000 students to studies abroad costing India \$10 billion annually? What are Foreign Educators seeking in India? What are we seeking from them? Do they have winning models? What are their experiences from other Developing Nations? Should Indian Educators fear or embrace Foreign Educators? Should we prefer to compete or collaborate with them?

Session IV:
Creating National Skills, Education & Training Ecosystem
What's the noise about Education's legal-regulatory environment? Do the new Bills address what ails Indian Education? Does Education need regulations or liberalization? How can we ensure that RTE truly makes a difference? Who will fund India's Education & Skills Development? What kind of public-private partnerships will win? Is Indian Education for-profit or not-for-profit?

Session V:
Lessons from Winning Mentor-Mentee Relationships
Let's award and honour India's role model Mentor & Mentees. What can Education learn from Role Model Mentor-Mentees in Art, Dance, Music, Poetry, Literature and Culture? Do we still find Guru-Shishya Parampara relevant in modern times? In what fields do these models of "apprenticeship" exist? How will we apply Mentorship in the times of technology and internet?

Closing Plenary Session VI:
Awards Distribution & Valedictory Session
Is India ready for the far-reaching changes in Education & Skills Development landscape? Like the "Green Revolution" and "IT Revolution", is an "Education Revolution" on the anvil? Who will win or lose in this journey? What roles will Educators, Employers, Regulators & Private Sector play in times to come? Can India become the Educational epicentre of the World?
